

Neuro-agility: Boost brainpower and learning

Our current world....the era of disruptive and transformative change

1. The brain of the average worker must process 30 times more information than 20 years ago
2. It's estimated that 75-90 % of all chronic illnesses originate from chronic stress
3. 90% of what is learnt is lost in a week if not reinforced
4. 60-70% of people will lose their jobs in next 10 years
5. 80-90% of serious injuries and accidents have been attributed to human error
6. Disengagement costs productivity loss of US \$450-550bn

Neuro-agility

Out think, out learn, out perform

Dr. Andre Vermeulen

*Neuroscience of Learning
Thought Leader and Creator
of Neuro-link Brain Profiling*

Boost brainpower and learning agility and enable people and your organisation to thrive in the future world of work by measuring and improving Neuro-agility

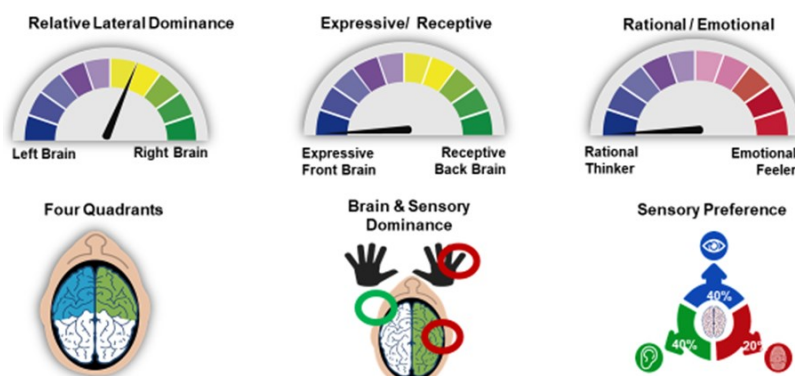

DRIVERS THAT OPTIMIZE BRAIN PERFORMANCE

Learning agility and other cognitive thinking skills have been identified as the key skills needed for the future.

Neuro-agility is the new paradigm for talent development and performance enhancement, both measuring and enabling to understanding your own unique neurological design and the drivers that can optimise brain performance.

FACTORS THAT IMPACT PEOPLE'S UNIQUE NEURO-DESIGN AND LEARNING POTENTIAL

The journey to self-mastery, excellence and happiness, starts with identifying your neuro-design (potential), optimising the drivers that impact your brain performance, developing appropriate skills that are aligned with your neuro-design and continuously reinforcing those skills!

Services we offer to boost neuro-agility:

Neuro-link Brain Profiling for Individuals and Teams

Neuro-link's brain profiles provide validated and highly reliable information which can help people understand themselves and others better and make informed decisions about optimising their brain performance, developing themselves to become the best they can be.

It is not a psychometric test. The brain profile assessment indicates a person's unique neurological wiring. We have simplified neuroscience to avoid being too technical. The brain profile assessment identifies 6 drivers that can be enhanced for optimum brain performance and 7 different neurological learning styles.

A brain profile helps you to:

- Improve your mental performance
- Identify drivers that optimise your potential
- Make informed career and job choices
- Understand & manage yourself and others more effectively
- Understand your unique communication style.

Neuro- agility Masterclasses

Brain-based experiential workshops to boost neuro-agility.

Bitesize and one-day sessions utilising the latest brain-based research and technologies to:

- Develop people from neuroscientific perspective
- Manage diversity
- Enhance emotional intelligence
- Identify people's unique potential
- Increase performance
- Maintain mental wellness
- Accelerate learning

Participants will learn how to:

- Identify and accelerate the 6 drivers of brain agility to optimise their brain fitness & performance
- Leverage the 7 factors that make up their own unique neurological design
- Improve the way they learn, simpler, better & faster
- Understand their response to stress, boosting health & wellbeing.

Licensed Practitioner Accreditation

If you are an in-house coach, facilitator, trainer or L&D specialist, or an external consultant focused on improving individual, team or organisational performance, becoming an accredited expert in Neuro-agility could enable you to add more value.

Accreditation will enable you to:

- Run and de-brief Neuro-link brain profiles for individuals and teams
- Boost the impact of your coaching and leadership development programmes
- Facilitate Neuro-agility masterclasses within organisations

Accreditation includes:

- 2 day accreditation workshop
- Extensive online learning resources, videos & manuals
- 4 Neuro-link brain profiles for practice and validation
- Membership of FPG's Neuro-agility community for continuous learning and best practise.

Full Potential Group specialises in high-impact leadership development, team performance and coaching which creates business growth by unlocking the talent within. We have developed over 300,000 people in over 1,000 organisations, including companies such as Nationwide, Tesco, Heinz, United Utilities and Diabetes UK.
